L'azienda

Nata nel 1976, la nostra azienda, situata nei pressi di Cagliari, opera nel settore metalmeccanico da ormai quarant'anni. Dalla fondazione ad oggi la sua crescita è stata esponenziale.

L'impegno, la passione, la costante attenzione verso le problematiche e le esigenze del mercato, l'interesse verso nuove soluzioni tecnologiche, l'accuratezza nella selezione delle risorse produttive e l'ottimizzazione del loro impiego ci hanno permesso di migliorare giorno dopo giorno la nostra attività produttiva e quindi di offrire alla nostra clientela un servizio sempre più efficiente ed uno standard qualitativo sempre più elevato.

La struttura organizzativa della nostra azienda è ora in grado di gestire ogni aspetto del ciclo di vita del prodotto: dalla progettazione allo sviluppo; dalla pianificazione alla produzione su commessa; dall'assemblaggio alla consegna ed il montaggio.

Grazie all'esperienza maturata nei diversi settori di produzione, oggetto della nostra attività, oggi siamo in grado non soltanto di soddisfare in pieno le richieste dei nostri Clienti, ma anche di suggerire innumerevoli alternative ai progetti da essi proposti.
